

Craigslist Homepage – Current Design

KEY ISSUES

- ✗ **Outdated and overly text-heavy interface**
The design looks old and lacks visual appeal, making the website feel outdated.
- ✗ **Poor visual hierarchy and readability**
Everything looks the same (blue text links), making it difficult for users to scan and find important content.
- ✗ **Unclear navigation and information architecture**
Too many categories and links are placed together, causing cognitive overload for users.
- ✗ **No prominent search or call-to-action**
The search bar is small and not noticeable. Key actions like "Post an Ad" are not highlighted.
- ✗ **Not mobile friendly**
The current layout is not responsive and provides a poor experience on mobile devices.
- ✗ **Inconsistent layout and alignment**
The alignment, spacing, and section sizes are inconsistent across the page.

OPPORTUNITIES

- ✓ Create a modern, clean, and user-friendly design.
- ✓ Improve navigation with clear categories and icons.
- ✓ Highlight search and primary actions.
- ✓ Enhance readability with better typography, spacing, and contrast.
- ✓ Ensure a responsive design for all devices.
